

This Declassified Scope Once Used For Recon Missions Can Now Be Used To Take Photos From Super Far Away And It's Only \$29 For A Limited Time!

LOW STOCK WARNING: This product is almost sold out. [Order now](#) to reserve yours!

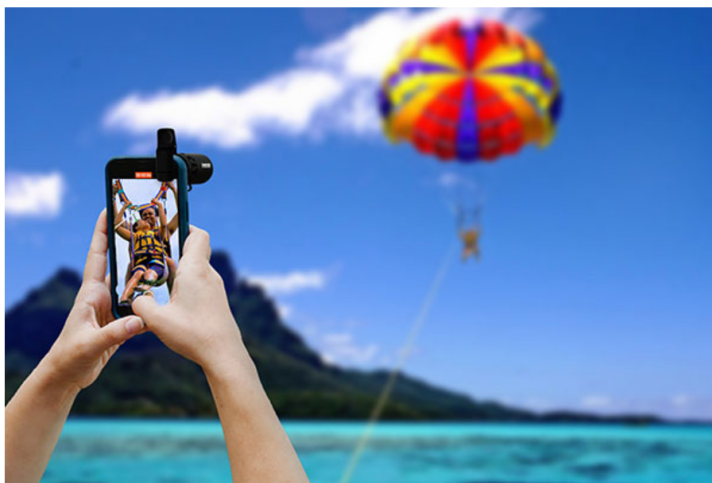

Written By Martin Howard

It's officially summer time! And that means it's time for summer vacation.

And the only thing anyone dreads about vacation is packing, especially if you're tugging three kids along with you.

Normally my wife and I bring along our DSLR camera to capture amazing family photos, but this year we didn't want to pay for the extra luggage or go through the hassle of carrying it through the airport all the way to Acapulco.

That's why this year we decided to give the [North Scope](#) a try instead - **and boy!** I'm sure glad we did!

“ *Not only did we end up taking amazing photos – they were surprisingly just as good as one from my DSLR.*

USERS LOVE NORTH SCOPE

What Is A North Scope?

The [North Scope](#) is one of my latest "tech gadget" finds I found on the internet. It's simply a high-powered mini telescope with lots of excellent features, such as a 10x magnification zoom and a phone camera attachment.

Plus, it was just recently declassified by the U.S. Special Forces for public use this summer, so I was curious to try it out.

But I'm not going to lie – I was skeptical at first. I mean, how could something this small be as good as a \$1,000 DSLR lens, even if it was used by Special Forces?

It turns out the answer is in the details.

Small Size, Big Results

The first thing we did when we arrived in Acapulco was go to the beach. And this was where we saw the power of the [North Scope](#) for the first time.

✓ Powerful 10x Magnification

While our three boys played in the sand, my wife and I observed tourists parasailing in the distance with the [North Scope](#). We were amazed how clearly you could see their faces while they were gliding along the sky.

It also came in handy keeping an eye on our oldest two boys when they went for a swim in the ocean a little later. It felt good keeping a close eye on them and clearly seeing if they were okay or not.

✓ Waterproof

I actually found this out firsthand, since I accidentally had the [North Scope](#) in my bathing suit pocket when my wife and I joined our boys in the water later. When we got out, I simply dried it off and was still able to see everything clear as day without any water stains.

✓ **Scratch-Resistant**

I was also impressed how there were no scratches to the handle or the lens after our vacation, especially with all the sand whipping around the beach all day long. It looked just as new now as it did when it first came out of the box.

✓ **Lightweight & Portable**

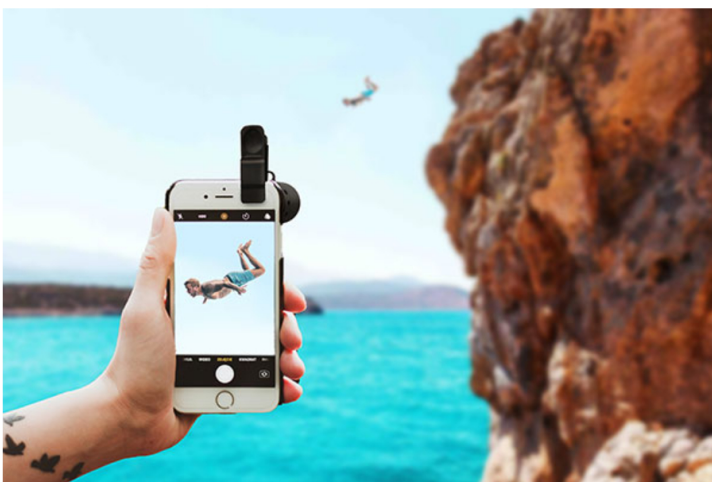

The [North Scope](#) weighs no more than a pound and comes with an easy-carry lanyard you can wrap around your wrist. You can also place it in your pocket or a purse, making it as easy to carry around everywhere you go.

✓ **Phone Camera Attachment**

I think our favorite feature of the [North Scope](#) by far, however, was the ability to attach the North Scope to our phone's camera lenses. (It was the whole reason we didn't need to lug around my heavy DSLR camera after all.)

We took pictures of the boys playing in the water from over 70 feet away! We took another with our youngest son riding his first horse along the beach. (We didn't want to get too close to scare the horse, so we took this also from several feet away.)

And we even got some killer shots of Acapulco's famous Quebrada Divers up close!

Why Should You get a North Scope?

After our amazing family vacation in Acapulco, I did more research on the [North Scope](#) and found even more impressive details about it:

✓ **Military Grade Design**

The [North Scope](#) is made from military-grade aluminum and is designed to withstand the harshest conditions.

Every [North Scope](#) was designed to withstand all kinds of rugged terrain with built-in scratch-resistant and slip-proof polymers. This makes each [North Scope](#) even suitable for military use.

✔ **10x Magnification Precision Lenses**

Each [North Scope](#) comes with a high-quality, machine-lasered lens, making each [North Scope](#) crystal clear in all lighting conditions – through rain, fog, heat, and dust. You can even adjust the focus manually with an adjustable 10x magnification zoom on the hilt.

✔ **Fully Multi-Coated (FMC)**

Each lens is fully coated to remove color fringing and to protect against scratches as well as other impact-related accidents.

✔ **Advanced Optics**

The lenses also come with advanced optical qualities such as:

- Advanced BAK-4 optical prisms (the same that is used in expensive binoculars)
- Barium Crown Glass for superior image quality
- Aspherical Lenses for removing distortion

✔ **Lightweight Portability**

Even with all these advanced optical capabilities, the [North Scope](#) only weighs a little over a pound and is small enough to place in your pocket for easy carrying. It even comes with a lanyard and is also designed for one-hand operation to make it easier for viewing.

It's So Powerful, You Can See Anything From Miles Away Like You're Standing Next To It!

Former U.S. Marine*

What Else Can the North Scope Do?

You don't need to go on vacation to enjoy a [North Scope](#).

After our family vacation in Acapulco, I took it on a hike in the Catskill

Mountains a few weeks later and enjoyed viewing the nature scenery everywhere with it.

You can even use a [North Scope](#) for:

- **Hunting**
- **Concerts**
- **Football Games**
- **And More!**

What Do North Scope Users Have to Say?

Don't just take my word for it. Here are some other reviews I found about North Scope on popular review sites:

INCREDIBLE!!

"Even after all my time in the military, I never seen a scope so light and crystal clear. Perfect for just about any outdoor activity like camping or hiking. Highly recommend! "

– Dan C., 47

Bird Watching Has Never Been Easier

"Ever since my eyesight started to fade a couple years ago, I haven't been able to enjoy watching the birds or nature as much as I used to. But thanks to this mini telescope, I've been able to see things crystal clear again."

– Marilyn L., 63

Best Gift Ever!

"A friend gave me this as a gift a few months ago and I couldn't be happier with it! I am able to attach it to my phone and take AMAZING photos of things in very high detail from incredibly far away. I love it!"

– Claire G., 49

Perfect For Hunting

"This telescope has been the best piece of equipment I've ever bought for hunting. It's easy to carry plus you can spot a buck hiding in the brush long before everyone does. I'm the first to the kill every time!"

– Trevor M., 54

How Can I Get My Own North Scope?

If you want to get your own [North Scope](#), you have to make sure you buy it from the right place.

Some “overseas marketers” are claiming to be the original manufacturer but end up sending you a knock-off version of the [North Scope](#) instead. The only way to make sure you’re getting it from the right place is by ordering it directly from the [official North Scope website](#) here.

Don’t wait too long either! Summer has just begun and demand is high.

UPDATE: 7/29/2021

First-time buyers can now score a 50% DISCOUNT on the North Scope. This product **sells out often**, so get yours before they are gone for the summer!
